

SIEMENS VDO

Hartridge™ and Siemens VDO to launch official repair programme for Common Rail Pumps...

Following an announcement in 2005 regarding the repair concept for Common Rail systems, Hartridge™ and Siemens VDO are pleased to announce that the official repair programme is now being “rolled out” to the Siemens VDO authorised workshop network.

The solution consists of:

- Siemens VDO Special Tooling
- Spare Parts
- Technical Documentation
- Training
- Hartridge™ Test Equipment and Software
- Test Plan Data for All Relevant Siemens VDO Common Rail Pump Types.

Siemens VDO will control supply of the repair concept via their authorised network.

Hartridge™ will be the sole supplier via its own distribution network of the test equipment and test data. The test solution is based exclusively on the AVM2-PC.

Furthermore, Siemens VDO strongly recommend the Hartridge™ test solution to test Siemens VDO Common Rail injectors.
