

Marketing Note: HMN58 Extractor Kit for Mercedes Sprinter Injector

Dear Customer,

We are pleased to announce the release of a new kit designed specifically for the extraction of Mercedes Sprinter injectors.

These injectors are notorious for sticking in the cylinder head, making their removal problematical, increasing the likelihood of damage. In many cases, the removal of the cylinder head can become necessary, making this a time-consuming and unprofitable exercise.

However, this extractor kit allows the injectors to be removed quickly and efficiently, saving time, parts and labour expenditure, resulting in a more profitable service.

Unlike similar extraction kits, this includes a hex head with a unique design that allows you to remove the top portion of the common-rail injector with the minimum of difficulty.
